PRAMIT KUMAR GHOSH

Nagpur | pramit.kr.ghosh02@gmail.com | 7044029708 | LinkedIn: linkedin.com/in/pramit-ghosh-345715228

SUMMARY

Motivated Computer Science Engineering student with strong foundations in programming, data structures, and machine learning concepts. Interested in backend development and AI-based applications. Passionate about leveraging machine learning techniques to solve complex problems and deliver impactful solutions.

SKILLS

Languages	C, Java, Python, SQL
Tools/Frameworks	Git, Hugging Face Transformers, Jupyter Notebook
Databases	SQL Plus, MySQL, PostgreSQL, Oracle Database (including PL/SQL)
Core Subjects	Data Structures, OOP, Database Management Systems, Operating Systems
AI & Data Science	Machine Learning Basics, NLP, Contextual Embeddings, GPT & BERT Models
Web Technologies	HTML, CSS, React.js

WORK EXPERIENCE

Summer Intern — Logistics Analytics *May 2026 – June 2026*

UltraTech Cement Ltd. (Aditya Birla Group) **LINK**

- Designed and delivered a fully automated logistics analytics dashboard using Excel VBA (~2,400 lines) that replaced a multi-hour manual reporting process, generating 7+ charts and 7+ data tables in under 5 seconds with zero errors.
- Engineered an in-memory data processing pipeline using Scripting.Dictionary objects and Variant arrays for O(1) lookups and bulk data operations across 10+ aggregated metrics.
- Prototyped the solution in Python (pandas) before rebuilding in VBA to match the end-users' existing Excel workflow — tool was adopted into the department's standard daily operations.

Data Science & Analytics Intern *May 2026 – June 2026*

Maincrafts Technology **LINK**

- Performed Exploratory Data Analysis (EDA) on the UCI Student Performance dataset (395 students, 33 attributes) using Python (pandas, matplotlib, NumPy) — analysed correlations between study time, parental education, and final grades.
- Conducted end-to-end EDA on the Titanic dataset (891 passengers) — engineered features (Age Groups, Family Size), handled missing values.
- Built publication-quality visualisations using matplotlib and seaborn — histograms with KDE, correlation heatmaps, grouped bar charts, and scatter plots with jitter.
- Applied data cleaning, groupby aggregation, and statistical analysis pipelines across multiple datasets, developing proficiency in the full Python data science stack (pandas, NumPy, matplotlib, seaborn).

Data Science Intern *March 2026 – May 2026*

RD Infro Technology, Chennai **LINK**

- Performed end-to-end ML pipeline on 1M+ records: data cleaning, EDA, feature engineering, and model training.
- Trained a Random Forest Regressor to predict daily store sales with ~15–20% RMSPE.
- Deployed the model as a Streamlit web application with real-time prediction for 1,115 stores.
- Tech Stack: Python, Pandas, Scikit-learn, Joblib, Streamlit, Jupyter Notebook.

EDUCATION

Bachelor's of Technology in Computer Science and Engineering *July 2024 – June 2028*
Symbiosis Institute of Technology, Nagpur
- CGPA: 8.53

Class XII — Science *April 2022 – March 2024*
St. Claret School, Kolkata
- Percentage: 89.00%

Class X *March 2022*
St. Claret School, Kolkata
- Percentage: 91.20%

RESEARCH PROJECTS

Contextual Embedding for Next Word Prediction *January 2025 – June 2025*
- Built next-word prediction models using LSTM, GRU, BERT, and GPT-2.
- Applied contextual embeddings and transformer-based NLP techniques.
- Tested performance on Penn Treebank dataset.

Fake News Detection using ML & DL *July 2025 – December 2025*
- Developed fake news detection system using SVM, LSTM, and BERT models.
- Implemented NLP preprocessing and feature extraction on 44K+ news dataset.
- Evaluated models using Accuracy, Precision, Recall, and F1-score.
- Published in Indian Patent Office Journal (2026) (App. No. 202521126334). **LINK**

AI-Driven Stock Market Prediction using ML *January 2026 – June 2025*
- Built a multi-model stock prediction system using Linear Regression, ARIMA, SVM, and LSTM in Python, forecasting next-day closing prices for 29 global assets with R^2 up to 0.97; engineered features from 5 years of OHLCV data (lagged prices, moving averages, daily returns).
- Developed an AI scoring engine combining prediction accuracy with Sharpe Ratio and Maximum Drawdown to auto-generate Buy/Hold/Sell recommendations; built an interactive Chart.js dashboard for portfolio optimisation and macro market analysis.

CERTIFICATES

Introduction to Python Programming by Red Hat Academy	**LINK**	*February 2025*
IBM SkillsBuild	**LINK**	*February 2025*
Data Structures and Algorithms by Infosys	**LINK**	*October 2025*
Red Hat System Administration	**LINK**	*April 2026*
Udemy: Mastering Agentic AI	**LINK**	*August 2026*
